

**WHEN WOMEN OWN LAND, WE ALL BENEFIT.**

Women make up 51% of the world's population and produce 60-80% of the world's agricultural products—yet women own less than 5% of the world's titled land.

When women get secure land rights, it can begin a progressive cycle—from status and hope to better nutrition, income, health,

access to credit, educational opportunities for their children, empowerment and security — not for just the family, but for the community, region and nation.

It only takes a little land to make a big difference.
